Total's Identity

-For Quality And Safety-

SSC 22000 Certification
SSC 22000 has been designed to address the requirements of ISO 22000, HACCP and other food safety management system requirements. China Total was first among Total Group to be certified.

FSSC 22000
ISO 22000
HACCP
PAS 220

GMI Certification (Germany, Mexico, Switzerland)
GMI is a globally recognized packaging quality certification program, an endorsement of packaging systems on the following components:

1. Process control and automation
2. Equipment maintenance
3. Training procedures
4. Operator capability
5. Equipment performance

VOC combustion equipment
This equipment burns off harmful VOCs and helps to control air quality and reduce the environmental impact of industrial processes. China Total has been certified for its system to contribute to the environmental health.
